

Graphic Design Principles

Lecture 3

Sashika Kumarasinghe

Department of Information Technology

Outline

- Design Principles
 - Contrast
 - Repetition
 - Alignment
 - Proximity
 - Balance
 - Space
- How are design principles used in graphic design?

“Most people make the mistake of thinking design is what it looks like. People think it’s this veneer – that the designers are handed this box and told, ‘Make it look good!’ That’s not what we think design is. It’s not just what it looks like and feels like. Design is how it works.”

-Steve Jobs

Design != Art

Principles of Design

- Contrast
- Repetition
- Alignment
- Proximity
- Balance
- Space

Contrast

- Contrast is the difference between various elements within a design, that makes them stand out from each other.
- It lets you draw out the most important elements of a design and **add emphasis**.
- **Increase readability.**
- High contrast can help guide the viewer's eyes to the most important parts of your design first.
- To strategically emphasize; use size, color, type and value.
 - Can use design elements that are in opposition to each other, like black and white, thick and thin, modern and traditional, etc.
 - Consider using contrasting colors or pairing bold typefaces with delicate fonts to add variety .

GOOD

BAD

Contrast Cont.

- If the elements (type, color, size, line thickness, shape, space, etc.) are not the same, then make them **very different**.

Contrast is often the most important visual element on the page.

AVOID ALL CAPS

- ALL CAPS ARE HARD FOR PEOPLE TO READ B/C THERE'S NO SHAPE TO THEM.

ALL CAPS HAVE NO SHAPE CODING

- Mixed-case sentences have redundant shape coding that make them easier to read.

Mixed-case sentences have redundant shape coding

SIZE CONTRAST

By adding size contrast to your design makes it more interesting visually and help to assure the key ideas of it, being the big item more important than the smaller, by playing with this type of contrast you can be sure to make viewers eye on the right are of the design layout.

www.venngage.com

Contrast in size

Activity

- Design a poster using GIMP by using different size, color, type, and value to highlight the use of contrast.

Repetition

- Repeat visual elements of the design throughout the piece.
- It reinforces an idea or perception.
- You can repeat color, shape, texture, spatial relationships, line thicknesses, sizes, images etc.
- Creates association and consistency.
- This helps develop the organization and strengthens the unity.

GOOD

BAD

GUCCI

Alignment

- Nothing should be placed on the page arbitrarily.
- Why?
 - Stronger cohesiveness
 - Connects spatially disconnected elements
- It helps ensure a sharp, ordered appearance
 - By ensuring various elements of design have a pleasing connection with each other.
 - Center, right, or left-aligned text is the most common.
 - Asymmetry and align text to other objects

Flush-left: safe and sure. The result has a well organized, conservative feel.

Flush-right: Slightly less conventional and more dynamic.

Visual disagreement. The result feels scattered and unsure.

Centered alignment: A common and conventional approach

Justified alignment: Letterspacing as a creative typographic solution

Subtle violation. The result looks accidental.

Optical Alignment in Design

- The brain perceives information a little differently than it actually is in the real world.
- Optical illusion: Optical illusions teach us how our eyes and brain work together to see.

Let's see what this icon would look like if we did everything exactly according to mathematics where the left and right indentation would be equal in pixel length:

Proximity

- Items relating to each other should be grouped close together.
- When several items are in close proximity to each other, they become one visual unit rather than several separate units.
- This helps organize information and reduces clutter.

Proximity Cont.

- Items that are not related to each other should not be in close proximity.
- The closeness or lack of closeness indicates the relationship.
- Elements that are intellectually connected should be visually connected.

WHAT'S HAPPENING IN...

REDWOOD COUNTY FORESTRY

August - 1996

▲ The two items on the top left are in close proximity to each other, implying a relationship. Should these two *have* a relationship?

▼ Was this your logical conclusion? Have the proper relationships been established?

What's happening in...

Related Skills

Excellent working knowledge of laboratory tests and their significance in oncology care through working in a clinical laboratory, reinforced while providing patient care. Assisted with bone marrow biopsy and aspiration, lumbar puncture, paracentesis, thoracentesis, and intrathecal chemotherapy administration. Promoted self-care skills and adaptation of the client to their disease and particular treatment program.

Extensive experience with at-home care of AIDS and cancer patients, including IV line maintenance, pain management; understanding of medicare reimbursement and social service referrals.

Education

1990 Associate in Science Nursing, High Honors
Santa Rosa Junior College, Santa Rosa, California.

Experience

1992-present Registered Nurse for Home Health Plus, Visit Division. At-home care of patients with multiple health problems, AIDS, and cancer patients.

1990-present Registered Nurse for Memorial Hospital Oncology Unit, Santa Rosa, California. Managed the care of 4-5 oncology patients. Assumed lead nurse responsibilities. Assisted with new RN orientation. Assisted with procedures, administered chemotherapy, assessed for side effects of chemotherapy and disease process.

1985-1986 Nurse's Aide for Mendocino Coast District Hospital, Fort Bragg, California. Assisted with patient care in Med-Surg and Obstetrical settings.

1985-1986 Lab Assistant for Mendocino Coast District Hospital, Fort Bragg, California. Computer skills while inputting data, cultured lab specimens.

Personal Statement

Previous work experience in a fast-paced, high-stress environment has fine-tuned my organizational skills. My experiences have made me comfortable with oncology patients and their families. Supervisors value my organizational skills, eagerness to learn and assume responsibilities, and my dedication to my job.

Design for humans, not
computers

Balance

- Balance refers to the arrangement of shapes, illustrations on the page.
- Balance gives a design its form and stability.
- But it doesn't mean elements need to be the same size, or that you must make symmetrical designs.
- The idea is to arrange elements within a layout, so they create a harmonious composition.
 - Formal(Symmetrical) balance
 - Informal(Asymmetrical) Balance
 - Radial Balance and etc.

Formal balance

- The placement of visual effects with equal distribution of visual weight on the left and right side of the imaginary center vertical axis.
- Left and right side are mirror images.
- Used to give appearance of solidity, tradition, reliability and other dependable ideals.
- Creates a more formal or classic feel.

AUTOCRATIC STYLE

Characteristics

- Chooses to make the majority of decisions on their own
- Prefers to keep control and responsibility over projects
- Isn't very likely to delegate decision making to others
- Prefers a clear structure and sets rigid expectations
- Rarely consults with others
- Isn't very interested in developing their skills
- Style is considered old-fashioned now

Advantages

- Short-term reduction of stress for leader
- Decisions can be made quickly
- When speed is important this is a good choice
- Useful for projects that have to be implemented in a hurry
- Helpful style for unmotivated employees

Disadvantages

- Not a popular style for the long-term
- Can have detrimental effects on the workforce as a whole
- Team members don't develop their decision-making skills
- A long-term increase of stress for leader
- Employees stop feeling invested in the company or its services
- Can lead to reduced motivation and morale in employees
- Ability to function becomes entirely reliant upon leader
- When leader leaves or is absent, team's productivity suffers

When To Use It

- Short-term, complex, technical, or urgent projects
- Low-skilled positions with monotonous tasks that can lead to low motivation
- Where there is high turnover in employees

DEMOCRATIC STYLE

Characteristics

- Makes decisions as a group
- Shares responsibility for making decisions, changes, deadlines
- Delegates a great deal of work
- Lets others have a say in what portion of work they take on
- Seeks continual feedback and looks for opportunities for development for themselves and their team
- Style is considered popular, creates a harmonious, productive, evolving workforce

Advantages

- Team members are more dedicated to their work
- They take ownership of situations
- Usually willing to work harder
- Reduced amount of internal politics
- Employees less likely to cover-up mistakes
- More likely to be honest about problems they see in process
- Decision-making is naturally improved
- Overall work environment is more positive and collaborative
- Less turnover in employees

Disadvantages

- Decisions can't be made quickly
- Style doesn't work for high-pressure need for fast decisions
- Leader may be forced to change to autocratic style in some cases
- They must work at creating a balance between allowing others to take lead and keeping control of the overall process

When To Use It

- When it's important that every team member contributes their own creativity and knowledge to the process
- When ready to prioritize training and team development
- When creating a new team of people who have not worked together before and need to get in gear quickly

BUREAUCRATIC STYLE

Characteristics

- Focuses on making certain employees follow rules consistently
- Employees are rewarded for following rules and producing consistently rather than for innovation or brainstorming
- Environment is more formal with clear distinctions between leaders and their employees
- Leader gains authority more from their position
- Style became popular when industrial era began

Advantages

- Helps promote consistent output and quality
- Useful when work is repetitive but must be done the exact same way each time
- Improve productivity in some environments
- Useful when tasks are highly segregated and dependent on each other
- Can cut costs

Disadvantages

- Environment can be very de-humanizing to individuals
- Employees perform their duties repetitively and without any personal creativity
- Can harm organization in the long run
- Leaders become territorial and see other leaders as rivals
- Can result in politics and excessive, restrictive policies
- Many distinct segments can result in communication problems

When To Use It

- When producing the image of regulation and control
- Where there needs to be rigid controls over health and safety measures

CHARISMATIC STYLE

Characteristics

- Inspires and influences the actions of others
- Commits to vision which they have to communicate to their team
- Often creates the vision, requiring the ability to generate excitement in others about new, possibly risky ideas
- Requires a great deal of energy to 'sell' the team on the vision and mission of the organization
- Builds trust by demonstrating personal integrity

Advantages

- The team is powerful with a charismatic leader
- Leader is committed, loyal, and willing to deliver above and beyond what is expected of them
- Includes and encourages each team member, and focuses on their development
- Team can be wildly creative and generate interesting, forward-thinking solutions to existing or new problems
- Team members will become leaders on their own, helping and encouraging teammates to remain committed to the vision

Disadvantages

- Requires a great deal of time from the leader
- They must constantly be responsible for representing the vision of the organization and embodying it in all that they do
- Can be stressful for the leader, taking time away from other responsibilities
- Leaves little room for making normal human errors, since so much relies on the personal relationships

When To Use It

- When commitment to a vision is the most important aspect
- If there is the need to work quickly, work hard, and get a new company, division, or product off the ground
- When rejuvenating an organization where team members have gotten stale or disheartened

Informal Balance

- More common than formal balance.
- Elements aren't weighted equally.
- Does not rely on centered effect(left and right side of page doesn't need to mirror each other).
- Gives appearance of modern, trendy, energetic, fresh, casual, and smart.

5 Stage Planning Process Hospital Timeline

St. Mary
Hospital

**JAN
2023**

STAGE 1: MASTER PLAN

Site selection, financial plan, analysis of what services will be at the new acute care hospital and other community locations.

**APR
2023**

STAGE 2: FUNCTIONAL PROGRAMS

Define specific services, staffing, equipment and space requirements.

**SEP
2023**

STAGE 3: PRELIMINARY DESIGNS

Preliminary project design and compliance, team warehouse simulator.

**FEB
2024**

STAGE 4: PROJECT BID

Architectural master plans, architectural master implementation plans for schedule, construction and design.

**JUL
2024**

STAGE 5: CONSTRUCTION IMPLEMENTATION

Award construction contract or Project Agreement.

For more on the capital planning process, view the MOHLTC-LHIN Joint Review Framework for Early Capital Planning Stages Toolkit.

Source: <https://www.wr.h.on.ca/Timeline>

Radial Balance

- Variation of formal balance
- Arrangement of visual elements around a central point
- When distribute elements around a single point, it can help draw the viewer's eyes to a key point.

Business Planning Mind Map

Creating your business plan is an important step towards developing a success-oriented business strategy. Here's how to streamline your business plan process and increase clarity.

Symmetrical Balance

Asymmetrical Balance

Radial Balance

Activity

Read on “Rule of Thirds” in computer graphic designing.

Space

- White space(or negative space) refers to area of a design that have no design elements.
- It doesn't need to be white always.
 - Can be an empty or blank space surrounding all the other elements.
- Having blank spaces also important as the ones you're filling with colors, text, and images.
- This space is important to make a design uncluttered, as well as for making various elements stand out.
- It provides visual breathing room for the eye.
- Add white space to make page less cramped, confusing, or overwhelming.
